ABSTRACT

This directory is designed to help people locate job and vocational-technical training and education in New Jersey which require less than a baccalaureate degree for completion. Part I is an alphabetical listing of job or occupational titles, derived from the programs offered in New Jersey's public and private institutions. The names of the institutions along with the countries, cost ranges, high school diploma requirements, and whether or not programs are offered during the day, the evening, or both are included for each job title. Part II contains a listing of public and private institutions which offer vocational-technical training. A listing of course offerings, addresses, admission and other requirements, and names of persons to contact is provided for the institutions, which are listed according to the type of training institution or service agency (e.g., area vocational schools, private schools, and manpower development and training programs). Part III consists of miscellaneous programs and services that may be of use in choosing a career or in completing the requirements necessary to begin job training. Included is information concerning high school equivalency, public adult education, private correspondence schools, real estate and insurance courses, vocational counseling centers, financial aid, and state employment service offices. An index of the institutions is provided. (SB)

This directory is a joint project of the State Department of Education's Division of Vocational Education and the Office of Student Affairs, in cooperation with the New Jersey Association of High School Councils.

Both the Department and State Student Council organization recognized the need for a publication that would present a comprehensive collection of information regarding programs offering job training below a baccalaureate degree throughout the State. The directory is intended for use by counselors, students, referral agencies, and all persons interested in where to find job training and services in New Jersey.

Several groups and individuals d

Several groups and individuals deserve special acknowledgement for their contributions to this publication: Dr. Po-yen Koo, Director of Vocational Data Collection and Evaluation initiated the directory's preparation; Mr. Joseph Priest, Coordinator of State and Federal Reports and Ms. Patricia Goodheart, Research Associate, collected, edited and compiled the information; Miss Carolyn M. Hamran was responsible for its composition; and Mr. Louis Napolitano and the 1972 and 1973 Executive Committees of the New Jersey Association of High School Councils recommended additions to its content and format, as well as urging its completion for the fullest possible use by and for students; and hundreds of people representing the schools and institutions listed in the directory provided its valuable information.

INDEX OF INSTITUTIONS - BY COUNTY 205

Fo

The purpose of this Directory is to help people locate job and vocational-technical training and education in New Jersey which require less than a baccalaureate degree for completion. It is intended for use only as a guide and does not suggest preferences or endorse any of the schools listed.

The content is divided into three major parts, with an introductory statement explaining each. Part I is an alphabetical listing of job or occupational titles, derived from the programs offered in New Jersey's public and private institutions (which are listed in Part II). It should be noted that a program may not completely fulfill all the requirements of a particular job or may be merely supplementary in nature.

Part II contains the listing of publi
tutions in New Jersey which offer voc
training. They are grouped according

Part III consists of miscellaneous pr
that may be of use in choosing or pre
or in completing the requirements nec
training.

The information in this Directory was

Part II contains the listing of public and private institutions in New Jersey which offer vocational-technical training. They are grouped according to type.

Part III consists of miscellaneous programs and services that may be of use in choosing or preparing for a career, or in completing the requirements necessary to begin job training.

The information in this Directory was collected in 1971, and is subject to change. Periodically, schools close and others open; courses are dropped and others added; and tuition rates are revised and raised. In all cases it is recommended that interested persons check the current status of any program being considered.

1/2

PART I

LISTING BY OCCUPATION

This part of the Directory consists of an alphabetical listing of occupational titles for which training and preparation is available in New Jersey. Because many similar jobs have different titles, a cross reference system has been used in this Part and, when possible, information concerning similar jobs has been presented under a single job title. Information is presented in table form, which will enable the user to make a rapid initial comparison of schools.

At the bottom of the first page there is a key explaining the codes and symbols used. The first two columns give the name of the institution and the county in which it is located. The third column gives the page number in Part II where each school is described in more detail. In the next column, an asterick is used if a high school diploma or equivalency certificate is required for admission. The fifth column indicates whether programs are offered day or evening, or both. The last column, entitled COST RANGE, has been set up whereby the total costs of the programs have been put into categories. In most cases, only one range will apply per school, however, there are some schools which offer different programs in the same occupational areas where, because of varying lengths of program, etc.,

cost ranges may vary. This has

cost ranges may vary. This has usually been indicated on the form by using more than one symbol. These symbols include no application, registration, or other fees that may be required by the school. They include only tuition. Please contact the school for exact cost figures.

If you are looking for a particular occupational title which is not listed, consider other job titles for the same occupation. For example, programs training x-ray technicians are listed under the job title of radiologic technologist. If you still do not find the occupation in which you are interested, contact the agencies listed in Parts II and III of this Directory, which include Apprenticeship and On-the-Job Training, Real Estate and Insurance, Private Correspondence Schools, Public Adult Education Courses, and the New Jersey State Training and Employment Service.

It should be noted that in some instances, no or only partial information has been given for particular schools or institutions. This is due to the fact that the information was unavailable at the time of compilation, and it is suggested that the user of this Directory contact the school for complete information.

BARBER

There are no licensed barber schools in New Jersey. One area vocational-technical school, listed below, does offer a course for barbers. In order to become a barber, a person must first receive a certificate as a registered apprentice barber. To do this a person must: a) have completed 8 grades of school or its equivalent; b) be at least 16 1/2 years old; c) be of good moral and temperate habits; and d) have been a resident of New Jersey for at least 1 year. The apprentice barber must work in a licensed barber shop for a registered barber for 18 months (5 days a week, 40 hours a week) in order to become a barber. For more information contact: The Secretary, Board of Barber Examiners, Health-Agriculture Building, Room 501, P.O. Box 1540, Trenton, New Jersey 08625; (609) 292-5620.

EMBALMER

The State of New Jersey requires embalmers and other practicioners of mortuary science to be licensed in order to practice. To qualify for the licensing examination, a person must have two academic years in a college or university; 2 years of practical experience, while a resident of New Jersey; and 1 year of instruction in an approved school of mortuary science. For more information contact: Board of Mortuary Science, Division of Professional Boards, Department of Law & Public Safety, 1100 Raymond Boulevard, Newark, New Jersey 07102; (201) 648-2532.

STENOGRAPHER

The following list includes schools that offer programs or courses usually entitled Stenography or Shorthand. However, two year secretarial science programs offered in colleges contain sufficient stenographic training and those schools are also included here. To find schools offering programs or courses which may include stenography, refer to those lists under the occupational titles of secretary and court reporter.

LISTING BY INSTITUTION

The information in this part has been divided into sections according to types of training institutions or service agencies. The sections are:

- A. Public Area Vocational-Technical Schools
- B. Private Business Schools
- C. Private Trade and Technical Schools
- D. Private Modeling Schools
- E. Private Beauty Schools
- F. Private Flight Schools
- G. Hospital Schools
- H. Pre-Baccalaureate Degree College Programs
- I. Manpower Development and Training Programs
- J. Apprenticeship and On-the-Job Training Programs

Information such as list of courses offered, addresses and phone numbers, admission and other requirements, and names of persons to contact is provided for each school listed.

Complete information may not be prov
of the institutions because the info
not available to us. Local public h
except for those designated as area
technical schools, have not been inc

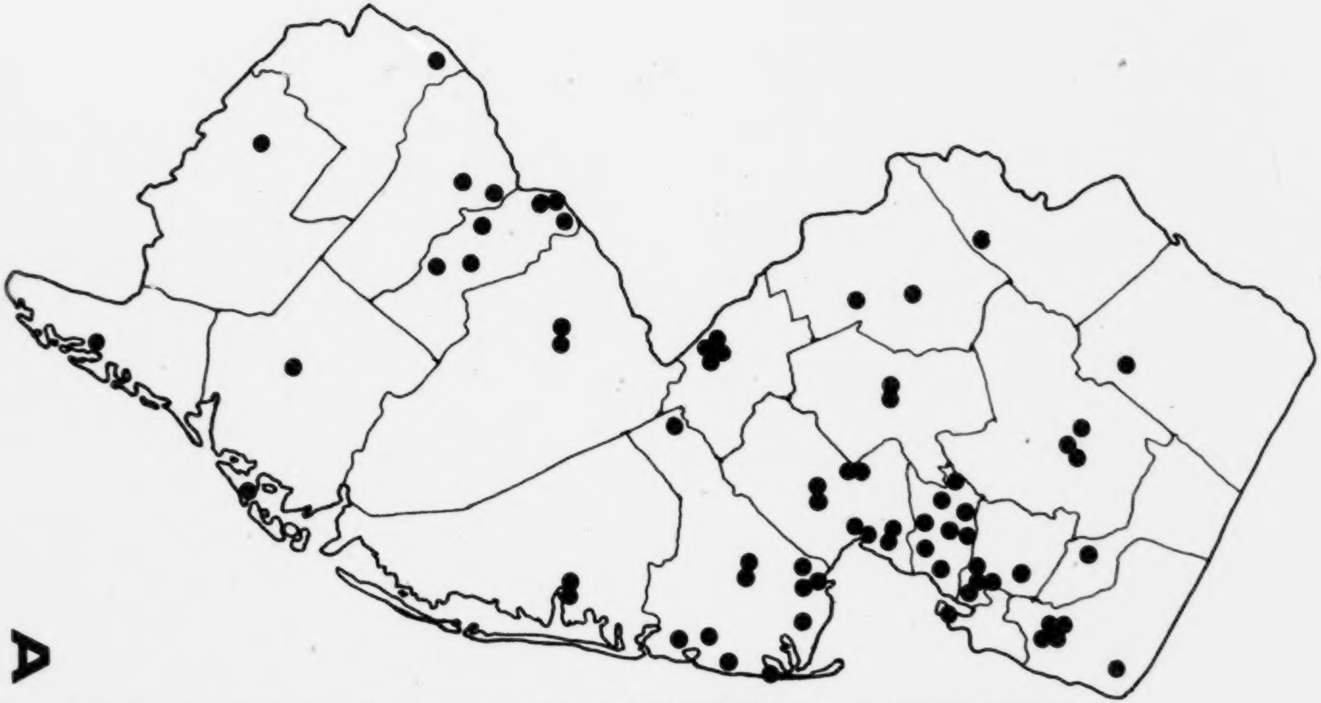
s to contact is

Complete information may not be provided for some of the institutions because the information was not available to us. Local public high schools, except for those designated as area vocational-technical schools, have not been included as the information for each school is readily available to its students and, as a rule, a student does not attend a public school of his choice at the high school level.

All of the schools included have been approved by an appropriate State agency, the Department of Education, the Department of Health, the Board of Nursing, or the Board of Beauty Culture. In addition, an indication is made when a school has been approved for the training of veterans and when it has been accredited by a nationally recognized accrediting agency.



A

PUBLIC AREA VOCATIONAL-TECHNICAL SCHOOLS

The most familiar type of area vocational-technical school is the specialized high school used principally for persons wishing to prepare for entrance into the labor market. It may also be a vocational-technical school for persons who have completed or left high school, or the department of a regular high school used principally for providing vocational education.

Most area vocational-technical schools offer both day and evening programs. High school students may attend an area vocational-technical school on a full-time basis and also receive the academic instruction necessary for graduation or will travel from a regular high school to the area vocational-technical school and in this way receive academic and vocational instruction on a shared-time basis.

Admission to an area vocational-technical school is open first to residents residing within its catchment areas. Other New Jersey residents are then admitted if space is available. In most cases, there is no tuition fee involved.

Requirements for admission vary from school to school, and may be different for programs within a school. However, high school students wishing to attend an area vocational-technical school at the high school level must make arrangements through their local school district.

ATLANTIC COUNTY

ATLANTIC CITY AREA VOCATIONAL-TECHNICAL SCHOOL

Atlantic City High School
41 North Illinois Avenue
Atlantic City 08401
(609) 344-1269

For complete information contact Mr. Joseph Laco, Director, day programs, or Mr. Alvin Gaskill, Director, evening programs.

Applicants must be in the 10th grade for daytime programs. These are two years in length unless otherwise stated. A High School Diploma and Certificate from the Technical Center are received upon completion.

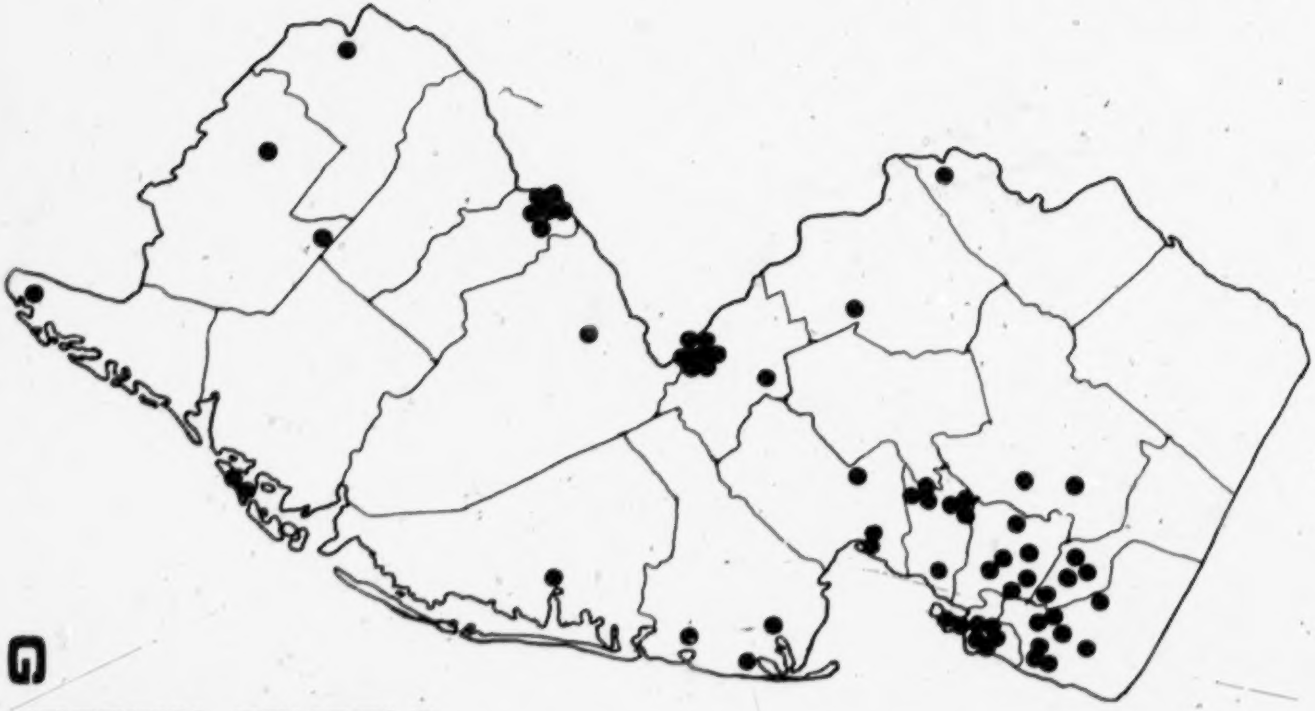
The flight training programs may begin at any time. The length of the training varies according to weather conditions and individual progress. Applicants must be able to read, write, and speak English; and show reasonable promise of staisfactory progress and completion. Approved by the Federal Aviation Administration and the Veterans Administration.

Flight training and ground school instruction are offered to prepare students to pass the FAA examinations required for rated pilots and ground instructors.



G

HOSPITAL SCHOOLS

Hospitals throughout New Jersey offer educational training programs for a variety of health-related occupations. The hospitals listed in this section offer educational programs in nursing (both practical and professional), radiologic technology, cytotechnology, histologic technique, nuclear medicine, and other medical laboratory assisting.

All professional and practical schools of nursing in the State must be accredited by the New Jersey Board of Nursing. Training programs for radiologic technologists (x-ray technicians) must be approved by the New Jersey Department of Health.

ANN MAY SCHOOL OF NURSING

Jersey Shore Medical Center
Fitkins Memorial Hospital
1945 Corlies Avenue
Neptune 07753 (Monmouth County)
(201) 775-5500, Extension 315

For complete information contact Ione Hoover, R.N.B.S.N., Director.

Applicants to the nursing program must be at least 17 years of age, graduated from high school in the upper half of their class, have health examiniation and personal interview, and satisfactorily complete college board examinations. During the 32 month program, 100 credits are received from Monmouth College in West Long Branch.

ATLANTIC CITY HOSPITAL SCHOOL OF CYTOTECHNOLOGY

I

PRE-BACCALAUREATE DEGREE COLLEGE PROGRAMS

This section includes all of the colleges in New Jersey that offer job oriented programs of study which can be completed in two or three years, and which require less than a baccalaureate degree for completion. Most of the colleges included are two year community colleges, although a few are four year colleges which offer programs at less than a baccalaureate degree level.

In general, the requirements for admission to a community college are the same throughout the State. A person does not have to have a high school diploma in order to take a course, but must have a high school diploma or equivalency certificate in order to matriculate for an associate degree. Associate degree programs are usually two years in length for full-time students. Part-time study is possible in most programs and this will usually require more than two years for completion. Many programs are offered both daytime and evening. Students are responsible for books, supplies, and application fees in addition to tuition.

ALPHONSUS COLLEGE

Overlook Drive
Woodcliff Lake 07675 (Bergen County)
(201) 391-8444

For complete information contact Mother Bernadette, Academic Dean.

Applicants must have satisfactory scholastic records, a recommendation from the high school principal, S.A.T. scores and a personal interview.

MANPOWER DEVELOPMENT & TRAINING PROGRAMS

Manpower Development and Training Programs are sponsored under a cooperative arrangement by the State Offices of Training & Employment Service, and the Department of Education, Division of Vocational Education. They are funded by the U.S. Department of Labor, and the U. S. Department of Health, Education, and Welfare.

The purpose of the programs are to: 1) provide entry-level occupational training and supportive services for unemployed and underemployed persons who cannot obtain appropriate full time employment without training; and 2) upgrade present skills and meet the job needs of workers displaced by automation, technological change, geographic relocation of industry, or other changes in the job market. The occupational
training offered in these

employment without train-
skills and meet the job
y automation, technologi-
ation of industry, or
ket. The occupational training offered in these programs is designed to meet the manpower shortages in labor market areas and there must be reasonable expectation of employment after training.

Generally, a person is eligible for these programs if he or she is over 18 years of age, unemployed or on the verge of unemployment, or a part time worker, as well as being interested in self-improvement. There are some MDT centers which offer Spanish speaking persons the bi-lingual Spanish-English course before engaging in actual skill training.

Usually, persons eligible for MDT Programs are enrolled through the local office of the State Employment Service.

APPRENTICESHIP TRAINING & ON-THE-JOB TRAINING

APPRENTICESHIP TRAINING

Apprenticeship training is the learning of a skilled trade through training on-the-job and learning the related technical knowledge in a classroom. The apprentice is usually a high school graduate, age 17 or over, with manual dexterity and other characteristics directly related to the trade he is learning.

The length of training varies from two to six years depending on the trade and is determined by standards adopted by industry.

Related training covers such subjects as mathematics, blueprint reading, applied English, and other technical courses related to the specific trade. Classroom work is usually conducted outside of working hours.

Apprentice wages begin at about one-half those of the fully trained craftsman. Wages advance at six month intervals until training is completed, then the apprentice is paid full journeyman wages.

Although there are about 350 apprenticeable trades, most apprentices in New Jersey are employed in one of the following occupational areas:

- Automobile Mechanics
- Bricklaying-Masonry
- Carpentry-Cabinetmaking
- Electrical
- Machine Shop
- Plumbing
- Printing
- Sheet Metal
- Steamfitting
- Tool and Die Making

Your first contact concerning apprenticeship information should be the apprentice coordinator in your county, as listed.

ON-THE-JOB TRAINING
(JOBS OPTIONAL PROGRAM)

These training programs are designed for people who are either unemployed due to a lack of skills, or people who are underemployed. Underemployed persons are ones who are working below their skill capacity; who are or have received notice that they will be working less than full time in their occupation; or ones who have received notice that they will be unemployed because their skills are becoming obsolete.

JOBS Optional Programs teach a person the necessary skills to do a job by carrying it out step by step under the close supervision of a skilled craftsman. The length of training varies from four weeks to 18 months.

JOBS Optional Program is available for disadvantaged persons (poor persons who do not have suitable employment who are either school dropouts, under age 22, age 45 or over, handicapped, or subject to special obstacles to employment), unemployed non-disadvantaged persons, and persons who are underemployed. These persons must be citizens or permanent residents of the United States or its possessions.

Occupations for which training under JOBS Optional Programs are not approved include occupations dependent on a commission as the primary source of income, sewing machine operators, bartenders, intermittent seasonal occupations, and professional occupations requiring licenses. Also, occupations which have not traditionally required specific occupational training as a prerequisite are not eligible.

The minimum starting wage of JOBS Optional Program employees is the employer's normal entry wage rate for the occupations for which they are being employed and trained.

Private businesses and industries hire employees into this program in accordance with federally established standards. Persons desiring complete information concerning the JOBS Optional Program may contact:

PART III

ADDITIONAL INFORMATION

The information included in this part briefly describes programs and services that may be of use in choosing or preparing for a career, or in completing the requirements necessary to begin job training. Names, addresses, and phone numbers are provided in most cases for each program or service so that anyone who may be interested can contact the appropriate office for complete information. Included here is information concerning High School Equivalency, Public Adult Education, Private Correspondence Schools, Real Estate and Insurance Courses, Vocational Counseling Centers, Financial Aid, and State Employment Service Offices.

Before attempting to obtain services from any of the agencies included in this part, contact the appropriate office for the necessary detailed information.

SECTION A: HIGH SCHOOL EQUIVALENCY

If you are not a high school graduate and wish to earn your high school equivalency certificate, there are three ways to do so. If you are over 18 years of age, a resident of New Jersey, and have been out of school at least one year, you are eligible. It is suggested that you talk with one of the high school equivalency personnel in your area before deciding which of the following plans is best for you.

A waiver of the age and/or out of school requirements may be granted, provided that you are over 16 years of age. The waiver form must be signed by a parent or one of the following: guidance counselor, high school principal,
probation or parole officer
selor, or a judge.

Plan 1

the following plans is

r out of school require-
vided that you are over 16
form must be signed by a
wing: guidance counselor, high school principal, superintendent of schools, probation or parole officer, State rehabilitation counselor, or a judge.

Plan 1

A total of 16 Carnegie Units is required for issuing a certificate under this plan. There are several ways to obtain Carnegie Units, the most obvious being actual work in an accredited high school. If you have successfully completed part of your secondary school work, you will have some Carnegie Units recorded at the high school you attended.

If you have successfully completed courses through the U.S. Armed Forces Institute, transcripts of such work should be sent to the High School Equivalency Office for evaluation. Veterans who are requesting credit for service school courses should send a photostatic copy of their records. Military personnel on active duty should also submit records of training for which credit is being sought. If you do not have such records, the High School Equivalency Office will advise you as to where they can be obtained.

If you need Carnegie Units beyond those you received in secondary school and/or those allowed by evaluation of military records, you may earn additional credits through successfully completing examinations. A list of subject area examinations and when and where they are given is available from the High School Equivalency Office.

Plan 2

If you have completed one full year in an accredited college, but do not have a high school diploma, you may apply for a high school equivalency certificate based on your college work. An official transcript must be sent to the High School Equivalency Office from the college.

Plan 3

You may apply for a high school equivalency certificate on the basis of having successfully passed the General Education Development (G.E.D.) Tests. There are five G.E.D. tests.

1. Correctness and Effectiveness of Expression
2. Interpretation of Reading Materials in Social Studies
3. Interpretation of Reading Materials in the Natural Sciences
4. Interpretation of Literary Materials
5. General Mathematical Ability

English Expression tests spelling, capitalization, punctuation, grammar, correct and effective usage, vocabulary, and sentence clarity and balance. Social Studies uses reading selections from areas of social, political, economic, and clutural topics to check ability to read critically, to interpret, and to understand basic concepts in social studies. Science uses reading selections from the natural sciences to check the ability to understand scientific principles and vocabulary, to discern relationships, and to reach conclusions. Literature uses reading selections from varied forms of literature to check the ability to interpret figurative language, mood, purpose, style, and character. Mathematics checks the ability to solve word problems in general mathematics, elementary algebra and plane geometry, and reasoning.

In order to successfully pass the G.E.D. tests, you must score a total of at least 35 points on each of the five tests and, in addition, must score a total of at least 225 points for all the tests. If you do not pass the test, you are eligible for retesting. If you do achieve the total number of points necessary but fail an indivi
retake the test failed.
225 points required, yo
of five tests. In case
and fee is required.

Plan 3 G.E.D. tests may
tificates of two years

tal number of points necessary but fail an individual examination, you need only retake the test failed. If you do not receive the total 225 points required, you should retake the entire battery of five tests. In case of a retest, a new application and fee is required.

Plan 3 G.E.D. tests may also be used for equivalency certificates of two years of high school education. The procedure for applying is the same. In order to qualify for a 10th grade education certificate you must have a total of at least 195 points and at least 31 points on each of the five tests.

Numerous preparation courses for the General Education Development (G.E.D.) Tests are in operation throughout the State of New Jersey. Contact the High School Equivalency Office for a list of these programs.

Application

Persons who apply for equivalency certification through examinations select the date and site of testing before submitting the application. Consult the current schedule for this information.

Applications for tests in Plan 1 and Plan 3 are due in Trenton four weeks or 20 working days prior to the testing date. All applications must be accompanied by a $5 certified check or bank money order payable to the Commissioner of Education.

After your application is processed you will receive an admission ticket for the test center you request on your application. When you arrive at the center you will be asked for identification, and in addition to the admission ticket, you may need to show some other proof of identification. If you do not appear for the test on the date scheduled, you will have to forfeit your fee and reapply.

Other information
You will be given two hours per G.E.D. test. In most cases, three of the tests are taken on the first Saturday and two on the second Saturday. If you are taking Plan 1 tests you will be able to take a maximum of three tests in one day. Rules and regulations regarding conduct during the examination will be given by the proctors.

The staff of the High School Equivalency Office will be glad to answer any questions you might have. Applications and test schedules are available at high schools or from the High School Equivalency Office. All correspondence concerning any of the three plans should be directed to:

SECTION B: PUBLIC ADULT EDUCATION

Approximately 175 school districts throughout New Jersey are operating programs of adult education during evening hours. Most districts offer courses, usually at a minimal cost to the student, during the regular school year. A growing number of districts operate summer programs in addition to fall and spring sessions. The number and types of courses vary from district to district but a prospective student may attend classes in the district of his choice in most cases.

Basic education, language, regular academic, and avocational courses are offered as well as vocationally oriented courses of instruction. The majority of

programs that are of a

ge, regular academic, and a-
offered as well as vocational-
instruction. The majority of

programs that are of a vocational nature are not usually designed to completely prepare an individual for a particular job. They are excellent introductory or refresher courses, though, for someone who is either considering a change in career or for someone who wishes to brush up on certain aspects of a present job.

A person wishing to change careers, or to begin a career, and is unsure of what area to pursue may greatly benefit by enrolling in one or more areas in which he is interested and be introduced to some aspects of those particular areas. Perhaps, this will help in facilitating a wise career choice based on some concrete knowledge.

Adults who need to learn basic writing, reading, and elementary arithmetic in order to qualify for vocational training which will lead to employment are eligible for enrollment in tuition free courses which will teach these basic skills. For details concerning these courses, contact the Office of Adult Education, New Jersey State Department of Education, Division of Field Services, 225 West State Street, Trenton, New Jersey 08625, or call (609) 292-6472.

SECTION C: PRIVATE CORRESPONDENCE SCHOOLS

There are some private correspondence schools whose main offices are in New Jersey and which are approved by the New Jersey Department of Education. Additional correspondence schools are authorized to maintain licensed field representatives in the State. Information concerning these schools may be obtained by contacting the Office of Private Business and Correspondence Schools, Division of Vocational Education, New Jersey State Department of Education, 225 West State Street, Trenton, New Jersey 08625, or by calling (609) 292-5740.

Training is available in areas such as Heavy Equipment Operation, Truck Driving, Mail Order Business, Ad Writing, Small Engine Repair, Airline Careers, Millinery Design, Locksmithing, Photography, and Upholstery Trades from New Jersey based schools. Additional courses are offered in academic and language areas.

Course lengths vary as the student usually sets his own pace. All studying and examining is usually done in the home. Certificates of completion are awarded when the student successfully completes his course.

SECTION D: REAL ESTATE AND INSURANCE COURSES

Numerous institutions in New Jersey offer courses for real estate salesmen and brokers, insurance agents, brokers, and solicitors.

The New Jersey Real Estate Commission is the State agency responsible for approving real estate courses. Detailed information concerning courses and where and when they are offered is available from the New Jersey Department of Insurance, Division of New Jersey Real Estate Commission, 1100 Raymond Boulevard, Newark, New Jersey 07102, or by calling (201) 648-2800.

The New Jersey Department of Insurance, Education Section, is the agency which approves courses for insurance agents, brokers, and solicitors. Detailed information concerning courses in insurance can be obtained by contacting the Education Section, New Jersey Department of Insurance, Division of License, 201 East State Street, Trenton, New Jersey 08625, or by calling (609) 292-5075.

been evaluated and approved by the American Board of Counseling Services, and listed in their 1969-70 Directory. These centers have been included in this Directory because they offer vocational counseling. Most of them charge a fee for their services.

This section is not intended to be a complete listing of all sources of job or vocational counseling in New Jersey. Most public school systems and many private schools offer job and vocational counseling to students. In addition, the New Jersey State Training and Employment Service Offices and local organizations, such as the YMCA, sometimes sponsor vocational counseling services.

Some of the counseling centers listed in this section are located on college campuses but do not limit their clientele to college students. However, fees charged may vary for college and non-college clientele.

SECTION F: FINANCIAL AID

For persons wishing to continue their educations after high school, there are three types of Federal, State, or private financial assistance available. They are (1) scholarships - gifts which need not be repaid; (2) loans - sums to be repaid after the student finishes school; and (3) employment - part-time work arranged for a student while in school.

If you need financial assistance, this should be arranged when applying to a school or college for admission. Most education and training institutions have a person who can inform you of the financial assistance that will best suit your needs.

There are numerous sources of financial aid available to New Jersey's students. In addition to the financial aid listed below, assistance is available from service organizations and veterans benefits, private clubs and foundations, and so forth, which have various limitations and qualifications. Information concerning these programs should be available from the financial aid offices of the schools to which you have submitted applications.

The following are the major sources of financial aid in New Jersey.

1. NEW JERSEY GUARANTEED LOAN PROGRAM

To be eligible you must be (a) enrolled or accepted for enrollment as a full-time student at a Federally approved college, nursing, business, trade, or technical school; (b) a citizen of the United States (or intend to be as soon as the law permits); and (c) a resident of New Jersey for six months prior to filing application. Eligibility is not competitive and does not depend on academic standing.

You may borrow up to $1,000 yearly while a full-time student, but the total amount borrowed may not exceed $7,500.

Apply to any participating commercial or savings bank, savings and loan association, or credit union. Assistance in finding a conveniently located lending institution is available from most schools or by contacting the New Jersey Department of Higher Education, Student Loan Office, P.O. Box 1293, Trenton, New Jersey 08625. Phone (609) 292-3906.

2. NEW JERSEY STATE COMPETITIVE SCHOLARSHIPS

Each year this scholarship is awarded on a competitive basis to five percent of the students graduating from New Jersey high schools. To be considered, you must have good academic standing and financial need, and must plan to attend a two or four year college or a hospital school of nursing. Thirty-five percent of the scholarships are awarded to New Jersey residents attending school outside of New Jersey. Scholarships are renewable for every year of full-time undergraduate work as long as the holder achieves satisfactory
academic progress, remains
have financial need.

Recipients are awarded $500

Recipients are awarded $500 a year or the amount of tuition, whichever is less. Additional incentive stipends may be available to meet the cost of tuition and fees in amounts from $100 to $500.

Apply directly to college financial offices, or for further information, contact the Office of Student Financial Aid, Department of Higher Education, P.O. Box 1293, Trenton, New Jersey 08625. Phone (609) 292-3906.

3. NEW JERSEY EDUCATIONAL OPPORTUNITY FUND GRANTS

This program provides financial assistance to economically and educationally disadvantaged college students. Award of the grant does not depend upon class rank or college board scores, but you must be judged to have potential for college success to be eligible. In addition, you must have been accepted by a participating college and a resident of New Jersey for 12 months prior to receiving this grant. All the public community colleges and some of the two year private colleges in New Jersey participate in this program. Recipients of a New Jersey State Competitive Scholarship are not eligible for this grant.

You may receive from $250 to $1,000 per year. Students receiving E.O.F. Grants at New Jersey institutions participate in supportive programs to assist them academically.

Students who plan to attend New Jersey institutions should apply directly to the institution of their choice. Students who plan to attend institutions out of State should apply to the Educational Opportunity Fund, 225 West State Street, P.O. Box 1293, Trenton, New Jersey 08625. Phone (609) 292-3906.

4. FEDERAL EDUCATIONAL OPPORTUNITY GRANTS

You are eligible if you are a high school graduate of exceptional financial need and academic potential and, without this grant, would be unable to continue your education. You are considered to have exceptional financial need if your parents can contribute $625 or less to your education per academic year. You must be enrolled or accepted on a full-time basis at a participating college or school of nursing. All of New Jersey's public community colleges participate in this program.

If selected, you may receive grants from $200 to $1,000 per year. These amounts must be matched by the school.

Apply directly to the financial aid office of the participating school to which you have applied for admission.

5. NATIONAL DEFENSE STUDENT LOANS

To be eligible, you must be enrolled or accepted for enrollment in an institution participating in the program. These institutions include all New Jersey public community colleges, some private two year colleges, and some postsecondary secretarial and business schools. You must need the loan to continue your studies, you must carry at least half of the full work load of the institution, and must be considered capable of maintaining good academic standing.

You may borrow up to $1,000 each year, not exceeding a total of $5,000 for undergraduate study.

Apply to the financial aid office of the participating institution which has accepted you or in which you are enrolled.

6. COLLEGE WORK-STUDY

6. COLLEGE WORK-STUDY

Enrollment or acceptance as a full-time student in an institution participating in the College Work-Study Program is necessary for eligibility. Participating institutions include not only all New Jersey community colleges and some private two year colleges, but also some area vocational schools and proprietary institutions (postsecondary, secretarial, and business schools), with the limitation that the student may not work for the proprietary institution. You must be in need of earnings from part-time employment to pursue your course of study, and must be considered capable of maintaining good standing while employed under this program.

In general the salary paid is at least equal to the current minimum wage, although it is frequently higher. Students are employed for an average of 15 hours weekly during the academic year, and for a maximum of 40 hours weekly during summer and vacations. The educational institution makes arrangements to provide accepted students with employment in accordance with legal provisions of the program.

Apply to the financial aid office of the participating institution in which you are enrolled or to which you have been accepted.

7. VOCATIONAL WORK-STUDY PROGRAM

You are eligible for this program if you are between 15 and 21 years of age, enrolled in a full-time vocational education program (secondary or postsecondary), and demonstrate exceptional financial need.

A part-time job up to 15 hours per week and earning up to $350 during the academic year is available.

Contact your high school principal, superintendent of schools, or the financial aid office of a postsecondary vocational school.

SECTION G: NEW JERSEY STATE TRAINING AND EMPLOYMENT SERVICE

Many times the New Jersey State Training and Employment Service will sponsor people, who are unemployed or underemployed, in special training programs. These programs are set up on the basis of need in particular labor areas.

The State and Federal Governments sponsor several Youth Opportunity Centers and WIN - M.D.T.A. Centers in New Jersey. Youth Opportunity Centers aid in employing youth between the ages of 16 and 21 and, in addition, act as screening agents for WIN - M.D.T.A., and Job Corps Programs. New Jersey's large cities have separate facilities for their Youth Opportunity Centers and Newark and Jersey City have separate WIN - M.D.T.A. Centers, in addition. For more information concerning M.D.T.A. Programs, See Part II, Section I, Manpower Development and Training Programs.

There are Employment Service offices in 32 of New Jersey's cities. For information concerning the one nearest you, contact the Bureau of Training Services, New Jersey State Training and Employment Service, Department of Labor and Industry, John Fitch Plaza, Trenton, New Jersey 08625. Phone (609) 292-3029.
